# HES Research Socials...

...are new events brought to you by the HES Office of Research and Graduate Studies. Our goal is to generate awareness about strategic initiatives by major federal and foundation sponsors. It is our hopes that these socials can generate ideas and collaborations for new research and education adventures.

Sponsors seek our expertise to solve today's and tomorrow's problems. We took a look at the strategic plans and invite you to join us as we discuss topics of interest to federal and major foundation sponsors. Join us for informal sessions to learn how we can positively influence policy and research as we move forward!

We will explore:

- Current and future needs involving each topic.
- Ways for HES to contribute to a greater understanding on these issues.

Bring your collaborators (wherever they may be) to see how we can help shape a more positive future around the world!

Jung Ha-Brookshire, PhD, Associate Dean
