

Human Development and Family Science

University of Missouri

Degree Requirements for:

FAMILIES AND LIFESPAN DEVELOPMENT

Students explore the theory and research about families and individuals across the lifespan. Coursework focuses on bio-psycho-social development, family functioning, and interpersonal relationships in relevant settings. Diversity is emphasized through an examination of multicultural families and diverse family structures and processes. Variations in individual development and relationships associated with factors such as gender, race, ethnicity, social class and health status are considered.

All courses that count toward the HDFS major requirements must be completed with a grade of C or better. Grades of C- or below will not be accepted. HDFS 1600 must be taken before HDFS 2300 or any 3000 or 4000-level HDFS course. Students who wish to seek the Certified Family Life Educator credential (CFLE) from the National Council on Family Relations (NCFR) should consult with the Families and Lifespan academic adviser for the most current requirements. In addition to the Mizzou General Education and HES College requirements, the following courses comprise the Families and Lifespan Development emphasis area.
